

SHANK'S® CUSTOM FLOOR MOUNT TREATMENT STOCK TECHNICAL INFORMATION

General Information

This stock has been designed to hold a horse for routine examination and treatment.

Stock Frame

The Stock frame is 4" schedule 40 pipe. The overall size of the stock is 8' long x 3' wide x 8' high. The Stock is equipped with side rails made of 3" Schedule 40 pipe. These rails swing open to provide easy access to the animal. The stock is equipped with a variety of rope and halter ties to allow for securement of the animal during examination.

The Stock is fabricated from mild steel. The frame is then hot dip galvanized for durability and protection.

Padded Rear Kickboard

The Stock is equipped with a removable kickboard on one end. This kickboard is approximately 2' high and is hinged on one side to provide opening during examination. The kickboard is fully padded on one side.

Floor Sleeves

The Stock is secured to the floor by sliding it into four (4) pipe floor sleeves. These sleeves should be recess mounted into the concrete floor during building construction. As an option, the Stock can be built with flanges on the pipe frame to allow the Stock to be anchored to the floor.

Customization

The Stock can be customized by adding any feature not specified above.
